ACE - The Association of Computer Enthusiasts recently organised a seminar in collaboration with Microsoft.

It was held on 21st October and commenced at 1:00 pm. More than 200 students attended the session including students from other colleges too.

The exceptional speaker for the session was Mr Sandeep Giyyan Jethani (Director of ATS Infotech Pvt Ltd and founder of Mentorrbuddy.Com) accompanied by his coordinator Mr. Parveen Badoni

(Business Development Manager, ATS Infotech Pvt Ltd).

It was a 2 hour long informative session on various certified courses offered by Microsoft. It was quite engaging as the speakers were interactive and even hacked the mobile phone of a student and gave interesting details that all turned out to be true.

The students were satisfied by the end of the session and enthusiastic enough to register themselves for the offered courses. And the students were offered a good discount if they were fortunate enough to register in the first 50 entries for the course.
