INFINITY - THE TECHNOLOGY SOCIETY, SGGSCC
ANNUAL REPORT (2023-24)

Infinity- The Technology Society of Sri Guru Gobind Singh College of Commerce, University of Delhi is a consortium of Tech Mavericks from all courses that aims to ensure that the youth are given the expertise necessary to become skilled and knowledgeable about technology.

For the session 2023-24, Infinity organised the following -

Workshop on Graphic Designing

As the tech society of the college we take pride in our digital posters and designs that we put out on our social media platforms. To ensure we maintain the high quality of work we are known for we decided to organise a workshop for all members of the tech-team in our society. The aim of the workshop was to familiarise the members of the society with the tools used to make the posters and for internal development of the society in the graphics designing field. Due to the members' engaged participation the workshop was a success.

Graphista(Event) - A Graphic Designing Competition

Recently we organised Graphista, our graphic design competition. The event saw over 400 registrations, from 50+ colleges all across the country including institutions like IIM Rohtak, IIM Amritsar and DTU. The participants sent in their designs and after careful consideration, the results were announced .The top 3 participants were given prizes for their creations. The event was a success because of the participants eager participation and the extremely enthusiastic reception it received. We hope to deliver more such events in the coming term.

Partnership with WAGMI (Mudrex)

In this session, WAGMI, a student-led community, was also a partner. WAGMI is a Mudrex initiative that seeks to inspire students to innovate in the Web3.0 space through activities like live projects, quizzes, case competitions, AMA sessions, and panels with business leaders, among others. Through this partnership we delivered a workshop on Web 3.0 and how it's going to impact and shape the future. The session was really well received by the attendees, who were able to learn useful information in a topic that interests them.

Webinar on Growth of Digital Economy

We organised an insightful webinar on the transformation of India through Growth of Digital Rupee (Power of UPI and E-Rupee). The speaker for the webinar, Mr. Mayank Singh, delivered an impactful session on the topic and covered topics like how quickly India has adopted digital transactions, what this means for our future and how it compares to other economies across the globe. This online webinar saw over 100 attendees join in and get to learn more about their country and how it's transforming digitally.

Quiz on Data Privacy

We organised an online quiz on Cyber Security and Data Privacy on our Instagram account. Anyone with an account could participate in our quiz. This was done deliberately to make it as easy and seamless as possible for all interested to participate. The quiz attracted a lot of people as it was fun and participatory. Our aim was to create an interactive quiz that keeps people engaged and abreast of technological advancements.

AI Tools for Students (Monthly Series)

This year, we also launched a brand-new monthly series on AI tools with the intention of assisting students in completing tedious tasks with ease. We shared resources we personally use and love for everyone to explore and enjoy. The response we received was overwhelmingly positive, as students were ecstatic to find and use these tools. Based on the feedback, we later chose to share more of these resources with students each month.
